Situation Report # 25

Sunday, May 23, 2010 at 1200 hrs EDT

David Halstead
State Coordinating Officer

Weather Summary:

- According to the NOAA oil plume model, the oil spill is **50 miles** southwest of Pensacola, **105 miles** from Port St. Joe, and **280 miles** from Clearwater.
- **No direct oil impacts from any part of the plume are expected across the Florida coastline within at least the next 72 hours. High pressure will remain stationed over the northern-central gulf today as a weak trough of low pressure over the western Atlantic begins to drift west into the Southeastern US. Relatively light southeast to east winds are expected to continue through Monday night before shifting to the northwest on Tuesday and Wednesday while increasing to 10 knots. Calm 1-3 foot seas are expected through next week and weather is expected to remain favorable for deepwater operations through next several days, despite the chance of a few passing afternoon showers across the northern-central gulf from Tuesday through Saturday.**

Current Situation:

- **Florida beaches are open.**
- Unified Command estimates release rate of oil from Deepwater Horizon at 5,000 barrels per day.
- This event has been designated a Spill of National Significance.
